Quick Guide - Service Information Mercedes-Benz Trucks Portal

This Quick Guide is intended to support you in operating the Service Information Mercedes-Benz Trucks Portal.

service-info.mercedes-benz-trucks.com

For quick and easy understanding of the website, the main screens and functionalities are explained on the following pages.

Each function is explained graphically and in writing and visualized on the respective screens using blue boxes (□).

1. The Landing Page – Public

The landing page is the initial screen that is shown when accessing the Service Information Mercedes-Benz Trucks Portal via service-info.mercedes-benz-trucks.com.

The Mercedes-Benz logo is the **home button** to navigate back to the **landing page** from any subpage

Users can **login or register** via the landing page **to purchase** the RMI and diagnosis **products**

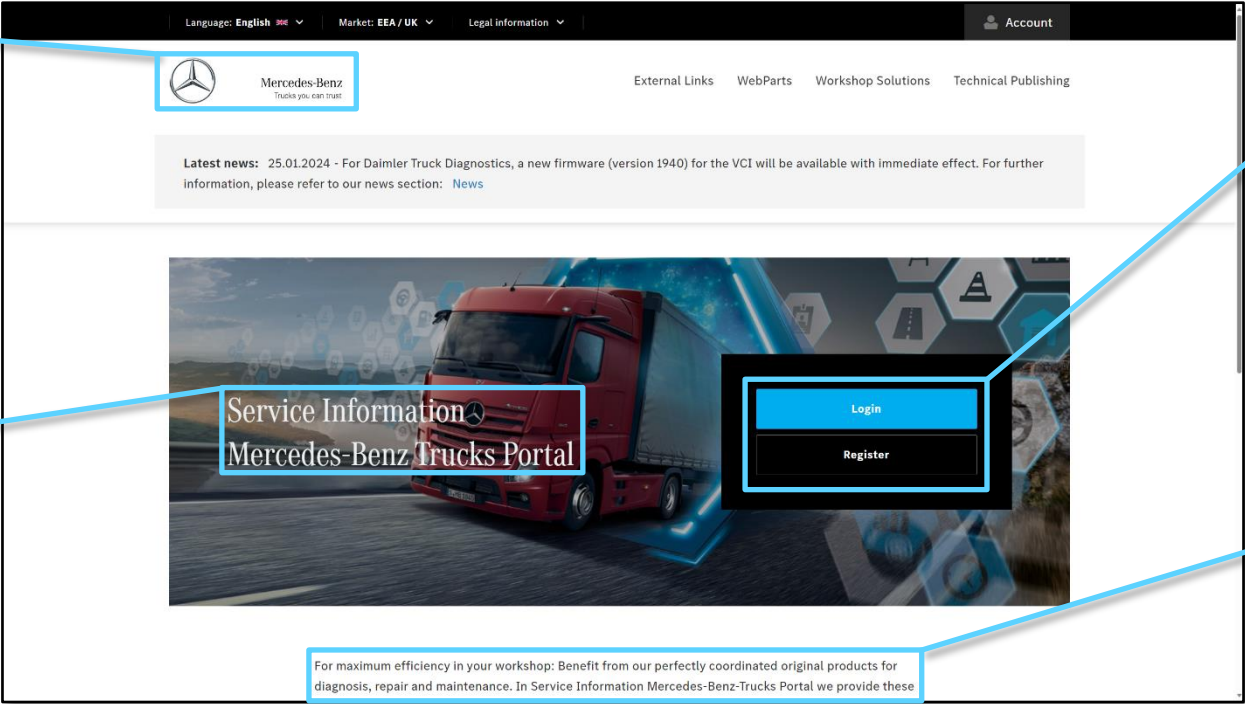

→ [Details](#) (registration process)

Name of the website

Description of **product scope** and **user groups** of the Service Information Mercedes-Benz Trucks Portal

Service Information Mercedes-Benz Trucks Portal

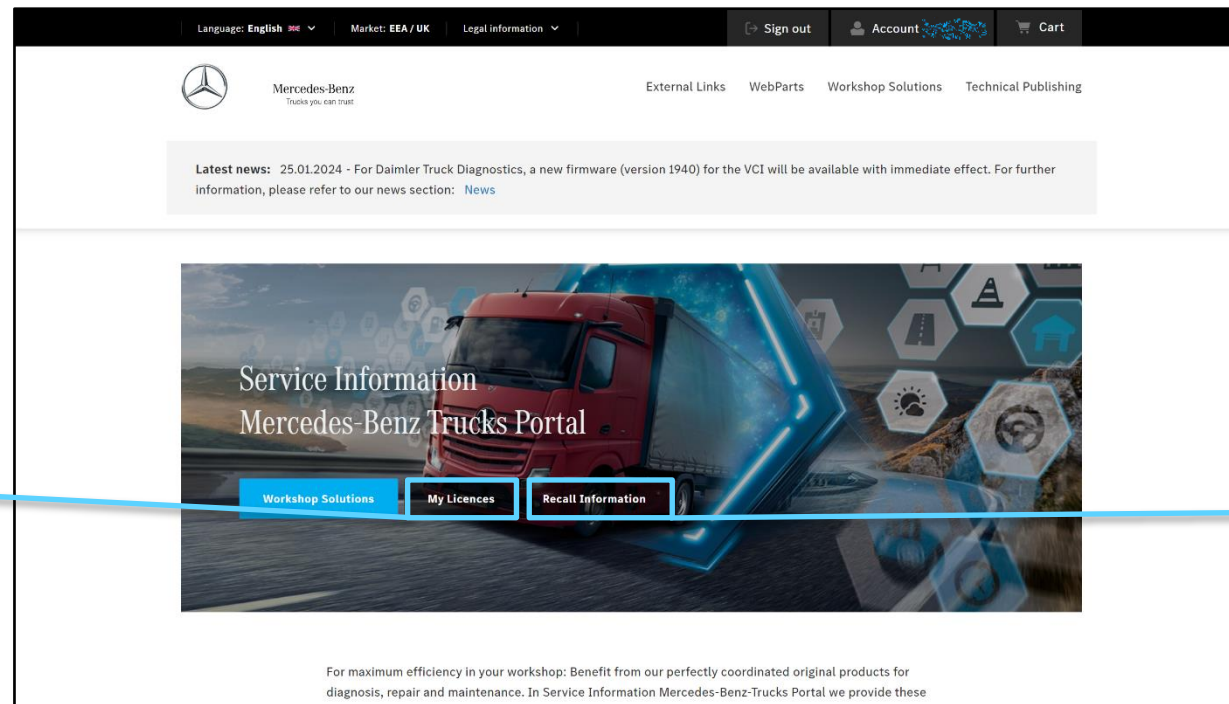

For maximum efficiency in your workshop: Benefit from our perfectly coordinated original products for diagnosis, repair and maintenance. In Service Information Mercedes-Benz-Trucks Portal we provide these

A screenshot of the Service Information Mercedes-Benz Trucks Portal landing page. The page features a dark header with navigation links: Language: English, Market: EEA / UK, Legal Information, and an Account button. Below the header is a navigation bar with links: External Links, WebParts, Workshop Solutions, and Technical Publishing. The main content area includes a 'Latest news' section with a date and a link to 'News'. The central part of the page is a large banner image of a red Mercedes-Benz truck with a semi-transparent overlay containing the text 'Service Information Mercedes-Benz Trucks Portal' and a 'Login' button. A 'Register' button is also visible below the 'Login' button. At the bottom of the page, there is a text block about workshop efficiency. Several callout boxes with blue borders and lines pointing to specific elements are overlaid on the page.

More information on the landing page is available on the next page

1. The Landing Page – Logged-in

The landing page is the initial screen that is shown when accessing the Service Information Mercedes-Benz Trucks Portal via service-info.mercedes-benz-trucks.com.

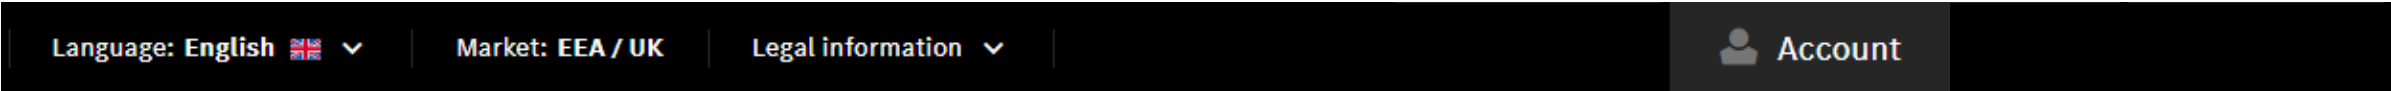

Logged-in users can access the My Licences subpage to view all **active and expired licenses**

→ [Details](#)

For all markets external websites that provide Daimler Truck relevant **vehicle recall information** can be accessed via the landing page

2. Header – Public

The website header is visible on every page of the Service Information Mercedes-Benz Trucks Portal and gives the user the possibility to choose a language and market as well as view legal information and account details.

Customize the website by **choosing your preferred language** from the list of available languages

View the **market** which is assigned to your user profile in UMAS

Access your **account information** including an overview of active time slices or credits

Select any of the provided **legal documents** from the dropdown list

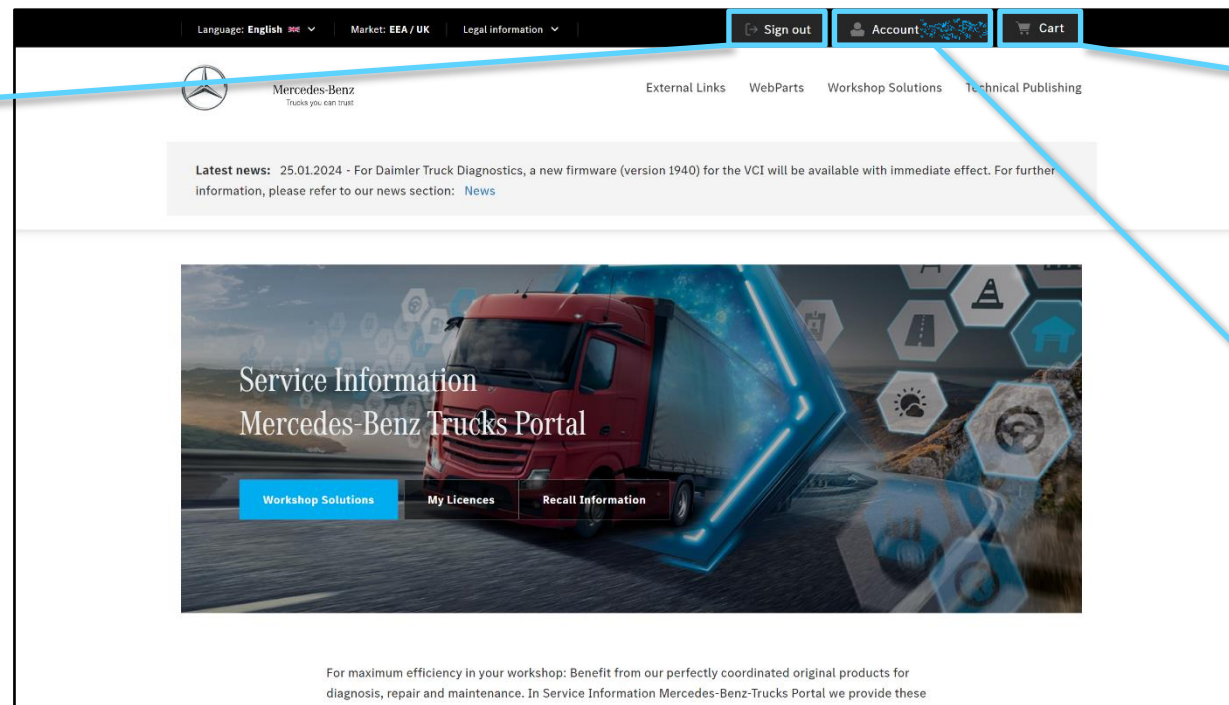

More information on the website header is available on the next page

2. Header – Logged-in

The website header for logged-in users provides the possibility to directly access the shopping cart and see the User-ID.

With the “Sign out” button you have the possibility to **log out of your account**

The **shopping cart** can be accessed by logged-in users via the header from any subpage of the Service Information Mercedes-Benz Trucks Portal

→ [Details](#)

Access your **account information** including an overview of active time slices or credits. When logged-in your User-ID is shown in the header

→ [Details](#)

3. Footer – Overview

The website footer is visible on every subpage of the Service Information Mercedes-Benz Trucks Portal and gives the user the possibility to quickly access all subpages as well as set cookie preferences and view the copyright notice.

Quickly **access all subpages** of the Service Information Mercedes-Benz Trucks Portal by choosing from the main categories **Parts, Workshop Solutions and Others**

The screenshot shows the footer of the Mercedes-Benz Trucks Portal. It features the Mercedes-Benz logo and tagline 'Trucks you can trust' at the top left. Below this, there are three main columns of links. The first column, labeled 'RMI', includes links to 'XENTRY Truck Workshop Information System', 'XENTRY Truck Operation Time', 'XENTRY Truck Partsinfo', 'XENTRY Truck TIPS', 'Digital Service Booklet Truck', and 'Periodical Technical Inspection (PTI)'. The second column, labeled 'Diagnostics', includes links to 'Daimler Truck Diagnostics Hardware', 'Daimler Truck Diagnostics PassThru', 'Remote Diagnosis App (XRD)', and 'Special tools'. The third column, labeled 'Others', includes links to 'Contact us', 'Quick Guide Service Information Portal', 'FAQ Help', 'ISO Navigation', and 'News'. At the bottom left, there is a copyright notice: '© 2024. Daimler Truck AG. All rights reserved.'. At the bottom right, there is a link labeled 'Provider / Copyright Notice'. Five callout boxes with blue borders and lines pointing to specific elements provide additional information: 1. A box on the left points to the 'RMI' and 'Diagnostics' columns, stating that users can quickly access all subpages by choosing from these main categories. 2. A box on the right points to the 'Contact us' link, stating that users can contact the Service Information Mercedes-Benz Trucks Portal customer support and providing a link to 'Details'. 3. A box on the right points to the 'ISO Navigation' link, stating that users can access the standardized Navigation according to the ISO 18541 standard and providing a link to 'Details'. 4. A box on the right points to the 'Provider / Copyright Notice' link, stating that users can view the copyright notice. 5. A box on the right points to the 'Quick Guide Service Information Portal' link, stating that users can access the standardized Navigation according to the ISO 18541 standard and providing a link to 'Details'.

This is an **overview** of the **available time slices** and **prices** in your market. You can **select** your chosen time slice by **clicking the respective radio** button. Logged-in users can add it to their shopping basket

More information on the XWIS product overview page is available on the next page

8.1. Workshop Solutions – XWIS – Description

The product overview page summarizes all relevant information for the XENTRY Truck Workshop Information System (XWIS), including available time slices, prices, product information, system requirements, and training documentation.

Short description of XWIS
including a summary of the key benefits for you and the customers

Learn more about XWIS by choosing one of the tabs
Details, System requirements or Product Information

About product

Optimized functions in a modern design.
Always up-to-date: The central Workshop Information System (WIS) will be even more efficient and user-friendly as XENTRY WIS (the successor to WIS).
XENTRY WIS provides you and your service employees with all important data related to all workshop orders:
Regardless of whether technical descriptions, work instructions and important information – XENTRY WIS is the place to go for the precise completion of maintenance or repair services.

Who benefits from XENTRY WIS?
Simply everyone: Service receptionists, diagnostic technicians, mechanics, W&G managers, IT employees – and our customers!

What are the benefits for you?

- ✓ Find the information you need more quickly
- ✓ Simplified use thanks to a modernized design
- ✓ More precise information search and time saving thanks to a clever connection to XENTRY TIS
- ✓ Rapid familiarization thanks to known WIS/XOT operating concept

What are the benefits for our customers?

- ✓ Quicker information and shorter waiting times

Details

System requirements

Product Information

What's new in XENTRY WIS?

- ✓ Mobile device application: Easy search process on your tablet
- ✓ Integration in XENTRY Portal: Uniform design and simplified application
- ✓ JAVA/OWS clients are no longer required
- ✓ Search for workshop information, integrated in the XENTRY Portal
- ✓ Integration into existing data exchange processes for linked data exchange

Daimler Truck Diagnostics PassThru

1 Year license 

Please provide Hardware ID

Time Credit:

☐ Hour 

☐ Day 

☐ 5 x 1 Hour 

☐ Week 

☐ Month 

Daimler Truck Diagnostics PassThru user must apply for the **Daimler Truck Standard Diagnostics Role** or the **Daimler Truck Diagnostics Flash Role** via UMAS, download and install the **basic setup** file and purchase the **one-year license** before purchasing time credits

This is an **overview** of the **available time slices** and **prices** in your market. You can **select** your chosen time slice by **clicking the respective radio** button. Logged-in users can add it to their shopping basket

More information on the DTDPT product overview page is available on the next page 

8.7. Workshop Solutions – Daimler Truck Diagnostics PassThru (DTDPT) - Details

The product overview page summarizes all relevant information for the Daimler Truck Diagnostics PassThru (DTDPT), including available time credits, prices, product information, system requirements, and training documentation.

If you want to use the **former XENTRY Flash user**, you can request for the **Flash Role** via **UMAS**

- ✓ Daimler Truck Diagnostics Standard Diagnostics Role (for diagnosis users without flash authorization, in example for reading fault memories)
- ✓ Daimler Truck Diagnostics Flash Role (corresponds to the former XENTRY Flash user)

Please use one of the following options:

Daimler Truck Diagnostics Standard Diagnostics Role:

Every diagnosis user must independently request the Standard Diagnosis rights via [UMAS](#) and run through the one-off identification process. It may also be necessary for the market-specific ISP support to create the user in ALICE if they do not yet have a user ID.

Daimler Truck Diagnostics Flash Role

- ✓ User already has Flash rights: Every Flash user must independently go through the one-off identification process at [UMAS](#)
- ✓ User does not have Flash rights: User must request Daimler Truck Diagnostics Flash Role through the market-specific channel and go through the one-off identification process at [UMAS](#)

Once your role was assigned, you have to download the basic setup of DTDPT to generate the hardware ID. This can be downloaded via: [DTDPT_Complete_Basis.zip](#)

To purchase the one-year license, we will need to verify that your company is working in the automotive sector. This check-up will be performed manually and can take up to several weeks.

The processing time when purchasing the time credits can exceed one day. We recommend that you buy time credits in advance to avoid waiting times.

Time credit options will be available once Daimler Truck AG service activate your yearly license shortly after the purchase. If you already have an active DTDPT license, you don't need to purchase a new license. You can directly buy time credits using the hardware ID of your setup.

Did you already know that...?

The validity of time credits begins to expire at the start of use.

A credit unit retains its validity following the end of the diagnosis session or after having changed vehicles until it has expired. Time credit purchased in error or that is no longer required cannot be returned or refunded. Any time credit that has not been used or activated once the contract has expired cannot be refunded. However, credit is transferred if you extend the contract.

If you **don't have flash authorization**, please use the **standard** diagnostic role that you will need to request permissions via **UMAS**

Download link for DTDPT basic setup (necessary to generate the hardware ID)

8.8. Workshop Solutions – XENTRY Remote Diagnosis App (XRD) - Overview

The product overview page summarizes all relevant information for the XENTRY Remote Diagnosis App (XRD), including available time slices, prices, product information, system requirements, and training documentation.

The highlighted price is per **default** set to the **hourly price** until another time slice is selected

Product ID of the selected XRD time slice

This is an **overview** of the **available time slices** and **prices** in your market. You can **select** your chosen time slice by **clicking the respective radio** button. Logged-in users can add it to their shopping basket

More information on the XRD product overview page is available on the next page

8.8. Workshop Solutions – XENTRY Remote Diagnosis App (XRD) - Details

The product overview page summarizes all relevant information for the XENTRY Remote Diagnosis App (XRD), including available time slices, prices, product information, system requirements, and training documentation.

QR-Code to download the XENTRY Remote Diagnosis App (XRD)

About product

"Power of diagnosis in your pocket": XENTRY Remote Diagnosis is the latest remote diagnosis solution for your workshop. Specially developed as a progressive web app for use on any mobile device (optimized for iOS and Android operating systems).

Your benefits at a glance:

Smart working
Our application transfers your workshop into the world of mobile devices, offering you the accessibility and flexibility of smartphones for your workshop.

Quick start
It's easier than ever before to get to work. If you have a mobile device, you're ready to go, getting started with diagnosis or searching for vehicle information.

More service
Preparing and scheduling for workshop visits gets easier, with the accessibility of data and information beforehand and during visits. This offers potentially quicker and more service at the same time.

How to Use XRD:

1. To download the App simply scan this QR Code.
2. Launch XENTRY Remote Diagnosis on your mobile device and add the app to your home screen so that you can access it conveniently at any time. Please note that this step may vary depending on your operating.
3. Purchase time credits.
4. Start the App on the device, login and get started.

Details

System requirements

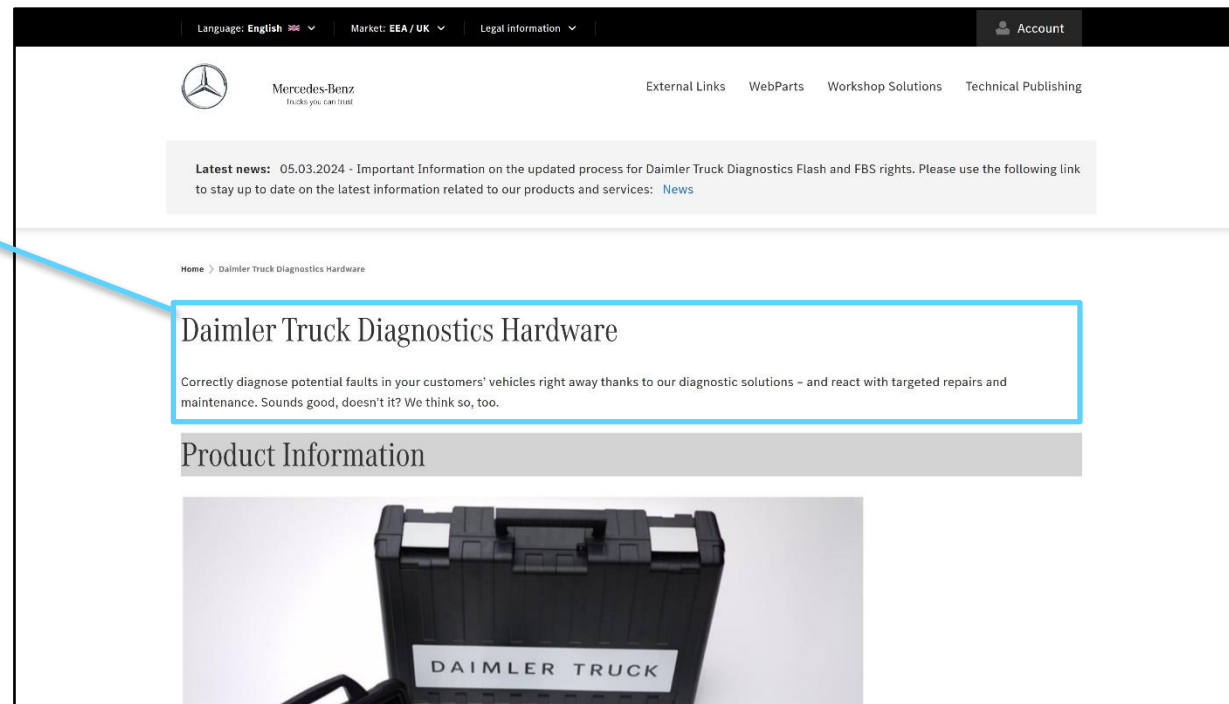

Product Information

Please note that the listed functions are only possible for Mercedes-Benz vehicles with telematics capability and subsidiaries of Daimler Trucks AG. The scope of functions of XENTRY Remote Diagnosis differs depending on vehicle model.

8.9. Workshop Solutions – Daimler Truck Diagnostics Hardware - Overview

The Daimler Truck Diagnostics Hardware overview page provides the user with product and purchasing details. Daimler Truck Diagnostics Hardware can be ordered via different purchasing channels depending on the market.

Here you will find a brief description of and **information about Daimler Truck Diagnostics Hardware**

More information on the Diagnostics Hardware product overview page is available on the next page

8.9. Workshop Solutions – Daimler Truck Diagnostics Hardware – Product Details

The Daimler Truck Diagnostics Hardware overview page provides the user with product and purchasing details. Daimler Truck Diagnostics Hardware can be ordered via different purchasing channels depending on the market.

Here you can find a **description** about the **Daimler Truck Diagnostics Kit** by clicking on “**read more...**”

Clicking on “**order here**” will take you **directly** to the **order section**

Product Information

1. Daimler Truck Diagnostics Kit

The Daimler Truck Diagnostics Kit I consists of two hardware components that can be quickly and easily integrated into your IT landscape:

2. Daimler Truck Accessories
Additional options are available with uniquely developed accessories for Daimler Truck Diagnostics VCI and Daimler Truck Diagnostics Pad 1.
read more... order here

Role and Rights Requirements

Important information:
To be able to use Daimler Truck Diagnostics software, you need to apply for additional diagnosis user rights. A distinction is made between two types of user rights:

- ✓ Daimler Truck Diagnostics Standard Diagnostics Role (for diagnosis users without flash authorization, in example for reading fault memories)
- ✓ Daimler Truck Diagnostics Flash Role (corresponds to the former XENTRY Flash user)

Please use one of the following options:

Daimler Truck Diagnostics Standard Diagnostics Role:
Every diagnosis user must independently request the Standard Diagnosis rights via [UMAS](#) and run through the one-off identification process. It may also be necessary for the market-specific ISP support to create the user in ALICE if they do not yet have a user ID.

Daimler Truck Diagnostics Flash Role

- ✓ User already has Flash rights: Every Flash user must independently go through the one-off identification process at [UMAS](#)
- ✓ User does not have Flash rights: User must request Daimler Truck Diagnostics Flash Role through the market-specific channel and go through the one-off identification process at [UMAS](#)

If you **don't have flash authorization**, please use the **standard** diagnostic role that you will need to request permissions via **UMAS**

More information on the Diagnostics Hardware product overview page is available on the next page

8.9. Workshop Solutions – Daimler Truck Diagnostics Hardware – Ordering

The Daimler Truck Diagnostics Hardware overview page provides the user with product and purchasing details. Daimler Truck Diagnostics Hardware can be ordered via different purchasing channels depending on the market.

For the **German Market**, please follow those instruction to order your Daimler Truck Diagnostics Hardware via the **Daimler Truck Diagnostics Shop**

Order Here:

Germany:

Within the German market users may order diagnostics hardware directly via Daimler Truck Diagnostics Shop.

<https://daimlertruck-diagnostics.arvato-digital.com>

User must request access to Daimler Truck Diagnostics Shop separately using the following link:

<https://aftersales.mercedes-benz.com/umas/login/dtdshop-orderoverview>

Once your access request has been approved, you will be able to log in with your UMAS login credentials.

European Economic Area / United Kingdom:

Users from all other European countries, including the UK, are encouraged to reach out to their local TOC or GD representative directly. Alternatively, you may use our support services to be connected with the appropriate contact person.

commercialadmin.pool-id@daimlertruck.com

All other **EU Markets** and **UK** can order it through their **local TOC or GD** representative

Important Information on SERMI Legislation and Process

Please note: An additional role requirement in relation to SERMI becomes effective for 3rd Parties (ISP) within the RMI Regulation as of 1st October 2023. The country-specific start dates will vary as not all Member States have an accredited Conformity Assessment Body (CAB) available in time.

Good to know:

How to find the right special tools

Product information for special tools is available in the XENTRY Truck Parts Information section under "Workshop equipment" or in the "XENTRY Truck Workshop Information System" (XENTRY Truck WIS) as part of the maintenance and repair documents. The part numbers for workshop equipment are composed as follows: W nnn 589 nn nn nn, W nnn 588 nn nn nn or W nnn 586 nn nn nn

9. Technical Publishing – Overview

All relevant information for technical publisher is available on the Technical Publishing landing page including access to diagnostic as well as repair and maintenance data via the described access channels.

These **tiles** provide an **overview** of the **scope** of Technical Publishing

The **Technical Publishing overview page** can be accessed via the standard navigation

More information on the Technical Publishing overview page is available on the next page

9. Technical Publishing – Access

All relevant information for technical publisher is available on the Technical Publishing landing page including access to diagnostic as well as repair and maintenance data via the described access channels.

To gain **access to technical publisher products**, users must register via UMAS and select the company type “Publisher”

After the registration users will be contacted by the Daimler Truck representatives to discuss contract and data access details

RMI Products
Retrieve relevant data from our XENTRY Workshop Information System (XENTRY WIS), including operational and standardized texts, estimated times, and labor values (XOT), as well as parts information from the database, to identify Daimler Truck GenuineParts.

Diagnostic Data
Use diagnostic data and information from Mercedes-Benz trucks in your multi-brand solution.

API Solutions
With our APIs, we promote the development of innovative business ideas around after sales and beyond. We provide API solutions such as Remote Diagnostic Support (RDS) and Remote Maintenance Support (RMS) that grant access to telediagnostic data relevant for diagnostics and maintenance purposes.

Access to Technical Publishing Products

To gain access to the various technical publishing products, you must create an account and get verified.

Customers not registered in UMAS
The verification process can be started via UMAS (select company type “Publisher”):
<https://aftersales.mercedes-benz.com/umas/registration/>

Customers registered in UMAS without publisher role
If you already have an UMAS account, you can apply for the company type “Publisher” via the UMAS support on the UMAS website.
The duration of the verification process may vary depending on the applicant. You will receive an email on the status of your validation and possible contract negotiation.

12. Register in UMAS – Overview

To login and purchase products of the Service Information Mercedes-Benz Trucks Portal, users must first set-up an account or request access rights to the Daimler Truck-specific Service Information Mercedes-Benz Trucks Portal via UMAS (<https://aftersales.mercedes-benz.com/umas/registration/#/new-org>).

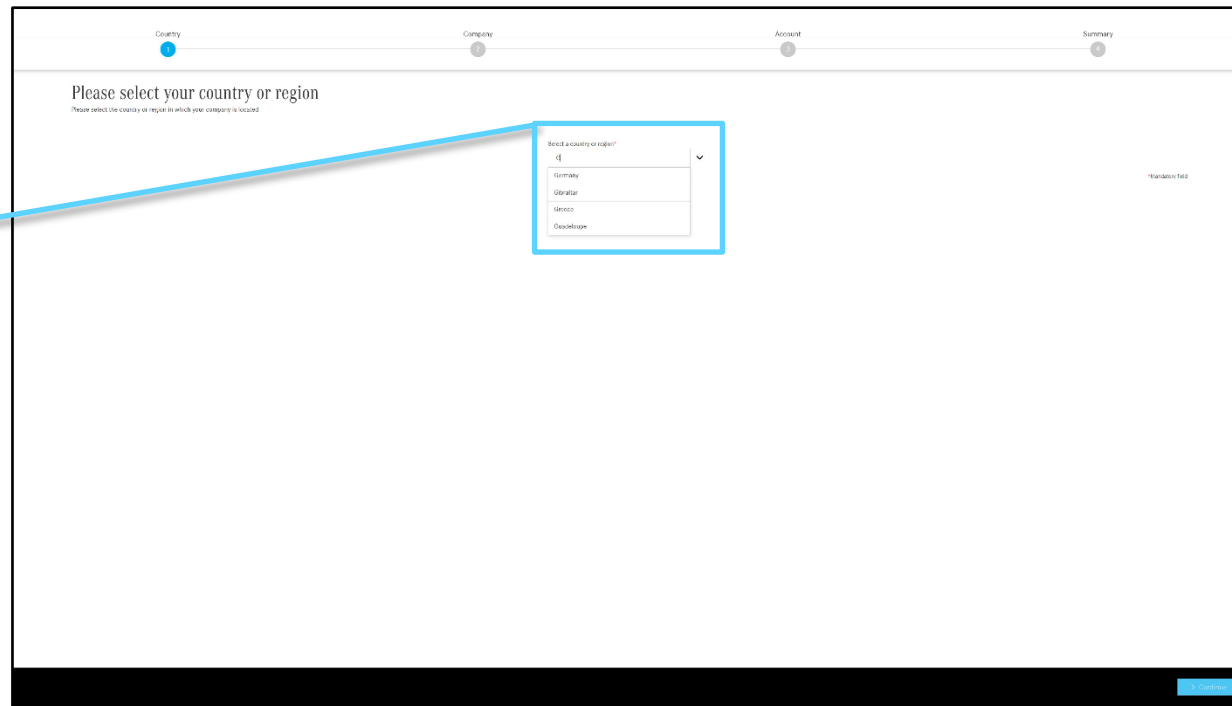

You can **start the registration** process by clicking "**Register**" on the landing page

More information on the UMAS registration process is available on the next page 

12. Register in UMAS – Market

To login and purchase products of the Service Information Mercedes-Benz Trucks Portal, users must first set-up an account or request access rights to the Daimler Truck-specific Service Information Mercedes-Benz Trucks Portal via UMAS (<https://aftersales.mercedes-benz.com/umas/registration/#/new-org>).

Select country or region

The screenshot displays the UMAS registration interface. At the top, a progress bar indicates four steps: 'Country' (active, marked with a blue dot), 'Company', 'Account', and 'Summary'. Below the progress bar, the main heading reads 'Please select your country or region' with a subtext 'Please select the country or region in which your company is located'. A dropdown menu is open, showing a search bar with a magnifying glass icon and a list of options: 'Germany', 'Ghana', 'Senegal', and 'Oceania'. A blue callout box with the text 'Select country or region' points to the dropdown menu. The bottom right corner of the page features a blue button labeled 'Next'.

More information on the UMAS registration process is available on the next page 

12. Register in UMAS – Company Details

To login and purchase products of the Service Information Mercedes-Benz Trucks Portal, users must first set-up an account or request access rights to the Daimler Truck-specific Service Information Mercedes-Benz Trucks Portal via UMAS (<https://aftersales.mercedes-benz.com/umas/registration/#/new-org>).

Fill in **company**, **address** and **tax** details

The screenshot shows the 'Add your company details' form in the UMAS registration process. The form is divided into four sections: Company, Address, Tax details, and Other. The 'Company' section includes fields for 'Company name', 'Company name (English)', and 'Company type'. The 'Address' section includes fields for 'Street', 'City', 'Postal code', 'Country', and 'Phone number'. The 'Tax details' section includes a field for 'VAT number'. The 'Other' section includes a field for 'Additional information'. A blue box highlights the 'Company', 'Address', and 'Tax details' sections. A blue arrow points from the text 'Fill in company, address and tax details' to the highlighted sections. The form has a progress bar at the top with four steps: Country, Company, Account, and Summary. The 'Company' step is currently active. At the bottom of the form, there are 'Back' and 'Continue' buttons.

More information on the UMAS registration process is available on the next page

12. Register in UMAS – Admin User

To login and purchase products of the Service Information Mercedes-Benz Trucks Portal, users must first set-up an account or request access rights to the Daimler Truck-specific Service Information Mercedes-Benz Trucks Portal via UMAS (<https://aftersales.mercedes-benz.com/umas/registration/#/new-org>).

Add admin user for company account (only necessary for newly registered companies)

The screenshot shows the 'Add user' registration form in the UMAS system. At the top, there is a progress bar with four steps: 'Country', 'Company', 'Account', and 'Summary'. The 'Account' step is currently active. Below the progress bar, the form title is 'Add user' with a sub-note: 'Please create a user for this company account. You will be able to create further users once you have saved this one.' The form contains several input fields: 'Lastname' (with a dropdown menu), 'First name', 'Last name', 'Email', 'To E-mail', and 'Company name'. There are also checkboxes for 'I am a dealer' and 'I am a customer'. A blue box highlights the 'Add user' button and the 'To E-mail' field. At the bottom of the form, there is a 'Back' button and a 'Next' button.

More information on the UMAS registration process is available on the next page 

12. Register in UMAS – Summary

To login and purchase products of the Service Information Mercedes-Benz Trucks Portal, users must first set-up an account or request access rights to the Daimler Truck-specific Service Information Mercedes-Benz Trucks Portal via UMAS (<https://aftersales.mercedes-benz.com/umas/registration/#/new-org>).
